- Meta-HTML and CSS in depth
- Meta-Programming with Javascript
- Meta-Introduction to Frontend Development
- Meta-Introduction to Backend Development
- Google-Digital Marketing
- Udemy-Project Management

🎓 Education

BSc in Computer Science, Enugu State University of Science and Technology

- *Data Structures & Algorithms, Problem Solving, Computer Architecture, Operating systems, Compiler Constructions, Computer Programming, Operational Research, OOP, Statistics, Software Engineering, etc.*

💼 Employment History

Full Stack Software Engineer
Decagon
Nov 2022 - Present

- Developed full-stack web applications using modern web technologies such as React, Node.js, and Express.
- Worked closely with cross-functional teams, including designers and product managers, to understand project requirements and deliver high-quality software.
- Experienced in Agile methodologies and ceremonies, such as daily stand-ups, sprint planning, and retrospective meetings.
- Proficient in cloud computing technologies such as Oracle, google cloud and others, with expertise In deploying and maintaining web applications in a secure and scalable manner.
- Demonstrated ability to work independently and manage time effectively in a remote work environment
- Experienced in collaborating with remote teams using communication and collaboration tools such as Slack, Zoom, and Trello
- Ensured high application performance and stability by working on database optimization, caching strategies, and load testing
- Familiar with continuous integration and deployment (CI/CD)

Frontend Engineer | Network/Infrastructure Administrator
Kropmann Communication, Lagos
November 2021 – October 2022

- Designed and implemented frontend features and user interfaces for web applications using modern web technologies such as HTML, CSS, and JavaScript.
- Worked collaboratively with designers and backend developers to ensure seamless integration of frontend features and application functionality.
- Developed and maintained network and infrastructure systems, including routers, switches, and firewalls, to ensure optimal network performance and security.
- Conducted network monitoring, troubleshooting, and resolved network-related issues in a timely manner to minimize downtime and ensure system availability.

- Implemented security measures such as firewalls, VPNs, and access control policies to ensure the confidentiality, integrity, and availability of network systems and data.
- Managed multiple projects and priorities simultaneously in a fast-paced, agile environment.
- Maintained up-to-date knowledge of emerging technologies and trends in frontend development, network administration, and cloud computing

Advanced Web Developer

Aptech Computer Education, Enugu

May 2019 – December 2019

- HTML
- CSS
- Bootstrap
- PHP
- MySQL

★ FEATURED PROJECTS

OmejeWorld

Developed and Published OmejeWorld, my personal portfolio which also has a blog on the latest news. The blog is updated using sanity studio.

Links: *Omejemma/omejeworld, OmejeWorld*

Movieski

Created a movie review site from back to front end using express.js and template engine.

Links: *movieski/github*

Gameio

Used rawg.io api to fetch their movie list and implement it using react and chakra ui

Links: *gameio/github gameio app*

Simple Calculator App – Web

Created a basic calculator with features like add, minus, multiply, and divide that has an awesome interface.
